CAPABILITY STATEMENT

Matera LLC

Transportation data analysis, transit accessibility and technical writing for public agencies and the firms that serve them.

Austin Foster, Principal · Denver, Colorado · austin@materallc.net · materallc.net

COMPANY OVERVIEW

Matera LLC is a Denver-based transportation analytics and technical writing practice. We help transit agencies, MPOs, local governments and consulting firms turn transportation data into clear decisions, defensible grant applications and published reports. Our principal has six years of public-sector and consulting experience across a state DOT and a national engineering firm, and presented at four national and regional conferences in 2025.

CORE COMPETENCIES

Transit Accessibility Snapshot

Access maps by time of day · Breakdown by neighborhood and household type · Short memo with findings and recommendations · Walkthrough call with your team

Plans, Reports & Grant Writing

Grant narratives and benefit write-ups · Plan chapters and performance reports · Public-facing summaries and explainers · Editing of drafts your team already has

Analyst on Call

GIS and spatial analysis · R, SQL and GTFS transit data · Travel forecasting support · Report production and quality checks

Matera LLC provides transportation planning, data analysis and writing services. It does not offer professional engineering services, and work that requires a licensed Professional Engineer's seal is outside its scope.

WHAT SETS US APART

- **An analyst who writes.** One person does the analysis and writes the report, so nothing gets lost between the model and the page.
- **Agency and consultant experience.** Has produced deliverables from inside a state DOT and for public clients as a consultant, and knows what reviewers and boards need to see.
- **Tested in front of peers and boards.** Presented transit job-accessibility and travel-flow work at TRB, ITE, Mpact and the Colorado Transportation Symposium, and briefed the Pueblo Transit Board and PACOG on study results.
- **Senior-level attention.** Small and responsive. Available as a prime on small contracts or as a subconsultant on larger teams.

PRINCIPAL'S EXPERIENCE

- **Pueblo Transit Areas of Persistent Poverty Study** AT MEAD & HUNT · 2025
  Main technical lead. Developed a new job-accessibility framework used to design new transit routes.
- **Maryland Mobility Report** AT MARYLAND DOT · 2020–2022
  Co-author of the department's annual statewide transportation performance report.
- **Transportation engineering & analysis** AT MEAD & HUNT · 2023–2026
  Signal timing, performance reporting and government deliverables for state and DOT-adjacent clients.
- **Travel forecasting & analysis** AT MARYLAND DOT · 2018–2022
  Travel demand and performance analysis in the Travel Forecasting & Analysis Division.

Work done by the principal as an employee of the organizations named.

SPEAKING

TRB · ITE Mountain District · Mpact · Colorado Transportation Symposium, plus briefings to the Pueblo Transit Board and PACOG (2025). Talks and summaries at materallc.net/speaking.
